- Face mount or recess mount installation
- Vertical & Horizontal Sliding
- Smooth Operation
- No springs or counter balances
- Stops at any position along the opening
- Simple fast assembly and installation
- Easy to adjust cord tensioning
- Cords are fully guided over stainless steel rollers

Overview

This versatile pleated mesh retractable screen developed specifically for bi-fold serveries and wide span awning windows. Sight lines are minimal due to the 20mm pleated mesh and slim line powder coated or anodized Aluminium frame is just 30mm wide making the screen ideal for installation to existing windows and doors. The screen is available as vertical pull-down or traditional horizontal sliding.

Monarch Lite is designed to be face mounted. The face mount option is ideal for use on windows where there is no room to install the screen inside the reveal or window frame.

Double sided adhesive tape is used to install the face fix screen option, eliminating unsightly fixings and improving installation times.

The screen is light and smooth to operate, the sliding bar can be positioned at any position and will not retract with force.

Size Range

Pull Down	2000mm high x 1350mm wide	Single Slide	2600mm high x 2500mm wide
	1100mm high x 2400mm wide	Double Slide	2600mm high x 5000mm wide

Other size configurations possible if size is no more than 2.7sqm in total
